Subject Index, Journal of Food Science, Volume 31, 1966

A

adenosine triphosphate in pork, 1
aflatoxins, effect of bivalent metals on production of, 432
aging of chicken, 482
alcohols,
  higher in fermentation of grape juice, 620
  in oil of citrus fruit, 167
aldehydes from methyl arachidonate, 191
aldolase activity of cod and haddock, 313
amino acid(s),
  in baked items, 736
  changes during roasting of cocoa beans, 202, 726
  effect of autoxidation of methyl oleate, 892
  of lamb, 1001
  of mutton, 1001
  sugar mixtures, 351
  of wheats and flours, 94
anaerobiosis and cherry scald, 226
anthocyanin(s),
  of black raspberries, 927
  of blueberry, 583
  of cherries, 226
  degradation in egg plant, 317
  determination as silyl derivatives, 971
  of huckleberry, 524
antibiotic treated fish, 982
antioxidant activity of quercetin, 395
antioxidants, effect of lipoxidase activity, 669
apparatus,
  absorption train for aroma fractions, 638
  coaxial-cylinder viscometer, 707
  continuous counter current liquid-liquid extractor, 63
  dead-weight testing, 686
  for isolation of volatile compounds, 937
  for low pressure bulk compression, 686
  for stimulation of muscle strips, 13
  for vapor pressure measurements, 196
apple, proanthocyanidins in, 964
apricots, canned, 178
ascorbic acid in,
  mangoes, 22
  mushrooms, 807
  sapodillas, 22
  spinach, 510
  tomatoes, 510
avocado, respiration during ripening, 332

B

bacillus, pectic acid transeliminase, 838
Bacillus stearothermophilus,
  growth and sporulation, 615
  heat resistance of, 437
  structure of, 437
bacteria, 22, 105, 111, 135, 234, 240, 419, 437, 441, 595, 605, 610, 615, 762, 768, 773, 838, 982, 988
  in fish, 982
  of rapid processed ham, 988
  removal by electrophoresis, 595
baking, effect on amino acids, 736
bananas, pectin methyl esterases in, 320
beans, green,
  changes in color, 488
  storage in controlled atmosphere, 488
beans, navy, nutritive value, 781
beef,
  aging of, 135, 151
  lactic acid and sugars in, 300
  mucoprotein of, 337
  proteolysis, 135
  tenderness, 135, 262, 450, 825
  reducing pathways, 855
  5′-ribonucleotides, 980
behavioral response to odor discrimination, 784
beta-carotene, stereoisomers, 359
beverages, fluoride content of, 941
blackening of canned clams, 400
blueberry, anthocyanins of, 583
bovine,
  collagen, 161
  muscle, 196, 825
bread-making, lipid changes during, 753
browning,
  of pork, 184
  protein carbonyl systems, 53
butter, flowing,
  pressure losses, 534
  rheological properties of, 534

C

canned,
  apricots, 178
  baby clams, 400
  beverages, 941
  lemon juice, 59
  vegetables, 941
Capsicum frutescens, pigment changes during ripening, 141
carbon-14-labeled,
  glucose, 914
  glycerine, 914
  polyoxyethylene (20) sorbitan, 253
carbonyls,
  in amino acid-sugar mixtures, 351
  determination of 5′-ribonucleotides in meats, 980
  of frozen peas, 328
  in oxidizing fat, 191
  protein browning systems, 53
  in wood smoke, 218
carotenoids,
  of muskmelon, 759
  of pineapple, 213
  of tomato, 461
carrageenan, interaction with cobalt complexes, 362
catechins in pears, 733
cellulose, structure of, 548
chemistry of fermented fish, 105
cherries,
  anthocyanin in, 226
  scald, 956
chicken,
  aroma of, 638
  competitive growth of microorganisms on, 111
  fatty acids in, 717
  fluorescence, 111
  freeze-dried, 791
  microbial growth patterns, 245
  muscle, 832

muscle proteins, 482
chlorophyll(s), 210
changes during ripening, 141
determination of, 210
in green beans, 488
in tomatoes, 461
in vegetables, 210
chocolate, precursors of, 202, 206
chromatography,
column, 105, 213, 317, 320, 552, 759, 838, 897, 927
gas, 63, 69, 81, 167, 172, 191, 218, 259, 268, 381, 389, 474, 529, 558, 566, 591, 664, 667, 717, 721, 726, 742, 751, 902, 951, 971
paper, 191, 381, 524, 549, 561, 583, 733, 807, 902, 914, 927
thin layer, 48, 141, 210, 328, 432, 542, 552, 588, 753, 897, 947, 964
citrus oils, deterpenation of by dimethyl sulfoxide, 529
clams, canned, 400
Clostridium perfringens,
medium for, 610
"mimic" MPN method, 610
cobalt complexes, interaction with carrageenan and hydrocolloids, 362
cocoa beans,
amino acids, 202, 726
sugars, 206
cocoa, farm-processed, immunogenicity of, 632
cod, aldolase activity, 313
collagen,
bovine, 161
intramuscular, 161
ovine, 161
porcine, 161
solubility of, 161
colorimetric determination of enzyme activity, 29
color morphology of muscle, 13
composition,
apple, 96
avocados, 332
baked items, 736
bananas, 320
beef, 300
beverages, 941
canned vegetables, 941
chicken, 717
cocoa beans, 202, 206, 726
cod, 313, 649
egg plant, 317
fish, 87, 829, 846
flour, 38, 94
grapefruit oil, 167
green vegetables, 210
haddock, 313
ham, 746
honey, 102, 902
hydrogenated fish oils, 48
Jamaica rum, 951
lamb, 994, 1001
lemon juice, 58
lemon oil, 167
lime, 167
meat, 980
muskmelon, 759
mutton, 994, 1001
peaches, 81
pears, 69, 733
peas, 328
pineapple, 213, 721
pork, 1, 300, 819
potatoes, 32, 157
tangerine oil, 167
vinegars, 172
wheat, 94
wood smoke, 218
compression components of puncture tests, 282
consistency, objective methods for, 1011
contracture band patterns of ovine muscle, 801
controlled atmosphere storage of,
green beans, 488
spinach, 510
copper, autoxidation of myoglobin, 468
crab meat, irradiated Pacific, 424
cytochrome oxidase in potatoes, 32

D

defatting of fish protein concentrate, 344
dehydrated,
chicken, 245, 791
egg, 223
foods, 878, 885, 892
rabbit, 293
shrimp, 419
sweet potatoes, 574
denaturation, effect of freeze drying, 293
deorodization, fish protein concentrate, 344
Desulfovibrio aestuarii, cause of olive brine spoilage, 768
deterpenation of citrus oils, 529
2,6-dichloro-4-nitroaniline residues in fruits, 259
diets,
navy beans in, 781
soy flour, 626
2,6-dimethoxyphenol in wood smoke, 1005
dimethyl sulfoxide deterpenation of citrus oils, 529
dye protein complexes, 29

E

egg plant, polyphenol oxidase activity, 317
egg powder, whole, 223
electrical stimulation, response of muscle tissue, 13
electrophoresis, removal of bacteria by, 595
electrophoretic mobility of bacteria, 595
electrophoretic patterns of chicken protein, 482
enzymatic activity of potatoes, 157
enzymes, 1, 22, 29, 32, 87, 135, 146, 157, 226, 313, 317, 320, 474, 574, 664, 669, 675, 781, 807, 829, 838, 855
equipment, see apparatus

F

fat, carbonyls in, 191
fatty acid(s),
changes during ripening of avocado, 332

esterification, 146
of fish oils, 48
of lipids and phospholipids of chicken, 717
uptake, 446
fatty esters, thiobarbituric-acid-reactive substances in, 552
fermentation,
beta-carotene stereoisomers, 359
effect on amino acids, 736
fermented,
baked items, 736
doughs, 753
fish, 105
grape juice, 620
fish, 87, 105, 146, 313, 344, 389, 649, 829, 846, 982
fish oils, hydrogenated, fatty acids in, 48
flavanone glycosides in grapefruit, 542
flavonoids, determination of as silyl derivatives, 971
flavor, stale, of sterile milk, 566
flavor change, relation to lipid oxidation, 675
flour(s),
air fractionated, 897
wheat, 94
fluorescence on chicken, 111
fluorescent antibody technique,
salmonellae detection, 240
staphylococcal enterotoxin B, 441, 605
fluoride content of foods and beverages, 941
foods, mechanical behavior of, 686
freeze-dried,
chicken, 245, 791
rabbit myosin, 293
shrimp, 419
freeze-drying, effect on denaturation, 293
frozen,
cod, 649
fish, 87
vegetables, 675
fruits,
anthocyanins, 226, 524, 583, 927
apple, 964
avocado, 332
bananas, 320
black raspberries, 927
blueberries, 583
cherries, 226, 956
2,6-dichloro-4-nitroaniline residues in, 259
essences, 63
essential oils, 167, 529, 588, 591
grapefruit, 542, 947
huckleberry, 524
irradiation of, 22, 863, 870
mangoes, 22, 863, 870
peach, 81
pear, 69, 558
pectin methyl esterase, 320
pentachlorophenol in, 742
pineapple, 721
proanthocyanidins, 964
respiration rate, 332
sapodillas, 22
sodium pentachlorophenate in, 742
volatile components, 69, 81, 558, 721

G

gel filtration, separation of protein components, 38
glucose,
caramel, 81
kinetics of reaction with glycine, 906
mechanism of reaction with glycine, 914
in pork, 1
reaction with insulin, 53
thermal polymerization of, 561
glycine,
kinetics of reaction with D-glucose, 906
mechanism of reaction with D-glucose, 914
glycogen,
in fish muscle, 846
in pork, 1
glycolysis,
of muscle, 13
post-mortem, 819
grapefruit,
alcohols in oil of, 167
flavanone glycosides in, 542
method for naringin, 947
naringin in, 542
grape juice, fermented, higher alcohols in, 620
greenhouse tomato, 461
growth of pigs affected by temperature and humidity, 309
guaiacol in wood smoke, 1005

H

haddock,
aldolase activity, 313
volatile components of, 389
ham,
processing temperature, 746
protein changes in, 746
rapid processed, 988
soluble proteins of, 409
Harpoden nehereus, protein concentrate, 344
heat,
inactivation of staphylococcal enterotoxin A, 762
radiation process for mangoes and sapodillas, 22
resistance of *Bacillus stearothermophilus,* 437
honey,
citrus, 102
lipids in, 902
huckleberry, anthocyanins of, 524
hydrocolloids, interaction with cobalt complexes, 362

I

ice cream,
frozen, rheological properties of, 699
melted, rheological properties of, 707
mix, rheological properties of, 707
immunogenicity of farm-processed cocoa, 632
INCAP, vegetable mixture, 626
insulin, reaction with glucose, 53
iron, autoxidation of oxymyoglobin, 468
irradiation,
and heat, 22
of Pacific crab meat, 424
of mangoes, 22, 863, 870
of sapodillas, 22

J

juice,
grape, 620
lemon, 58
pineapple, 213

L

lactic acid,
in beef and pork muscle, 300
in pork, 1, 13
lamb,
amino acid content, 1001
composition of, 994
tenderness of, 262, 450
lemon, alcohols in oil of, 167
lemon juice,
composition, 58
processing variables, 58
storage of fruit for, 58
lemon oil, analysis, 588, 591
lime, alcohols in oil of, 167
lipids,
in air fractionated flours, 897
changes during bread-making, 753
fatty acids of chicken, 717
in frozen vegetables, 675
in honey, 902
hydrolysis in peas, 474
oxidation in plant tissue, 664
lipoprotein,
from yolk plasma, 812
interaction with methyl orange, 812
lipoxidase, inactivation for TBA test, 664
lipoxidase activity,
in model systems, 669
in pea slurries, 669

M

mackerel, frozen storage, 87
Maillard reaction,
kinetic behavior, 906
mechanism, 914
mangoes,
delayed ripening, 863
heat-radiation process, 22
irradiation of, 870
skin-coated, 870
meat,
enzymatic reducing pathways, 855
oxidation-reduction potentials, 855
oxygen tension in, 855
reducing capacity of, 855
reduction of metmyoglobin, 855
5′-ribonucleotides in, 980
mechanical behavior of foods, 686
metal(s),
complexing activity of quercetin, 395
effect on aflatoxin production, 432
metallic ions, autoxidation of oxymyoglobin, 468
methyl anthranilate in citrus honey, 102
methyl arachidonate, 191
4-methyl guaiacol in wood smoke, 1005
methyl linoleate, autoxidation of, 878, 885, 892
methyl orange, interaction with low-density lipoprotein, 812
metmyoglobin, reduction of, 855
microbial growth,
in chicken, 245
patterns of shrimp, 419
microbiology of fermented fish, 105
microorganisms,
competitive growth on chicken, 111
in frozen vegetables, 234
milk, sterile concentrated, 566
model systems, freeze-dried, 878, 885, 892
mucoprotein of bovine muscle, 337
muscle,
bovine, 151, 196, 300, 337, 825
chicken, 482, 832
cod, 649
fish, 146, 846
meat quality, 504
morphology, 819
ovine, 497, 504, 801
pH, 497
porcine, 1, 300, 309, 819
protein solubility, 819
rabbit, 293
rate of post-mortem glycolysis, 13
shortening, 497
time course of rigor mortis, 13
turkey, 680
mushroom phenol oxidase, 807
muskmelons, carotenoids of, 759
mutton,
amino acid content, 1001
composition of, 994
myosin of rabbit muscle, 293
myosin B fraction of turkey muscle, 680

N

naringin in grapefruit, 542, 947
nucleotides in fish muscle, 846
nutritive value of navy beans, 781

O

objective evaluation of lamb tenderness, 262
objective methods,
for consistency, 1011
for texture, 791, 1011
odor discrimination, 784
odor qualities, stereochemical theory of, 118
olfactory demonstration of chicken aroma fractions 638
olive brines, *Desulfovibrio aestuarii* as spoilage cause, 768
ovine muscle, 801
oxidation-reduction potentials of meat, 855
oxygen tension of meat slurries, 855
oxymyoglobin, autoxidation of, 468

P

peach, volatile components of, 81
pears,
analysis of volatiles, 558
catechins in, 733
proanthocyanidins in, 733
volatile components of, 69

peas,
black-eye, 664
frozen, 328, 474
green, 664
lipid hydrolysis in, 474
volatile carbonyls in, 474
pectic acid transeliminase, 838
pectin,
changes in canned apricots, 178
changes during ripening of avocados, 332
gels, 373
methyl esterase of banana, 320
pentachlorophenol determination in fruits, 742
peppers, pigment changes during ripening, 141
phenol oxidase, mushroom, 807
phenols,
content of potatoes, 32, 157
in wood smoke, 1005
phospholipids of chicken, 717
pigments,
anthocyanins, 226, 317, 524, 583, 927, 971
beta-carotene, 461
carotenoids, 461, 759
chlorophylls, 141, 210, 461
lycopene, 461
metmyoglobin, 855
oxymyoglobin, 468
pigs, growth affected by temperature and humidity, 309
pineapple,
carotenoid composition, 213
sulfur components of flavor and aroma, 721
pineapple juice, 213
polymerization, thermal, of glucose, 561
polyoxyethylene (20) sorbitan monolaurate,
carbon-14-labeled, 253
metabolic fate, 253
polyphenol oxidase,
in egg plant, 317
in potatoes, 32
pomphrets, frozen storage, 87
pork,
browning of, 184
ham, 409, 746, 988
lactic acid and sugars in, 300
muscle properties, 309, 819
muscle stimulation, 13
post-mortem changes, 1
protein alterations, 819
reducing pathways, 855
5′-ribonucleotides in, 980
watery, 1
potatoes,
cytochrome oxidase, 32
enzymatic activity, 157
phenolic content, 32, 157
polyphenol oxidase, 32
specific gravity, 157
storage, 32
poultry,
aroma, 638
bacterial agents and histopathology, 773
chicken proteins, 482
chicken sarcolemmas, 832
fatty acids of chicken, 717
freeze-dried chicken, 245, 791
microorganisms and fluorescence, 111
post-mortem inspection, 773
proanthocyanidins,
in apple, 964
in pears, 733
protein(s),
all vegetable mixture, 626
carbonyl browning system, 53
electrophoretic behavior of bovine muscle, 151
fibrillar, 1
permeability of chicken sarcolemma to, 832
soluble from ham, 409, 746
solubility of bovine muscle, 151
water soluble fraction of wheat flour, 38
puncture tests, shear and compression components, 282

Q

quercetin,
antioxidant activity, 395
metal complexing activity, 395
primary antioxidant activity, 518
relation of structure, 518

R

rabbit muscle, 293
raspberries, black, anthocyanin pigments, 927
respiration rate(s),
of green beans, 488
ripening of avocado, 332
rheological properties,
of frozen ice cream, 699
of ice cream mix, 707
of melted ice cream, 707
of pectin gels, 373
5′-ribonucleotides in meat, 980
rum, Jamaica, volatile components of, 951

S

salmonellae, fluorescent antibody technique, 240
sapodillas, heat-radiation process, 22
sarcolemmas, chicken, permeability of, 832
sarcomere length, changes and tenderness, 825
sardines, frozen storage, 87
scald, in cherries, 226, 956
sensory analysis, 118
sensory evaluation,
and chromatographic analysis, 268
of lamb tenderness, 262
shear components of puncture tests, 282
shrimp, freeze-dried, 419
silyl derivatives, determination of anthocyanins and flavonoids as, 971
smoke, wood, 218, 1005
sodium pentachlorophenate, determination in fruits; 742
soy flour, all vegetable protein mixture, 626
soy protein dye complexes, 29
specific gravity of potatoes, 157
spectroscopy,
infrared, 69, 81, 167, 300, 328, 721, 733, 902, 951, 964

mass, 69, 167, 566, 951
nuclear magnetic resonance, 69, 964
ultraviolet, 69, 141, 226, 328, 362, 386, 432, 529, 552, 759, 838, 878, 914, 927, 980
visible, 141, 226, 328, 362, 386, 583, 733, 927, 980
spinach, ascorbic acid, 510
spores, heat resistance of *Bacillus stearothermophilus*, 437
squalene, thiobarbituric-acid-reactive substance in, 552
staphylococcal enterotoxin,
A, heat inactivation of, 762
B, immunofluorescent detection of, 441, 605
starches of sweet potato, 574
stereochemical theory of odor qualities, 118
sterile milk, 566
storage,
canned clams, 400
cod, 313
fish, 87, 313, 846, 982
frozen peas, 328
green beans, 488
haddock, 313
irradiated crab meat, 424
irradiated mangoes, 22, 863, 870
irradiated sapodillas, 22
lemons, 58
mackerel, 87
pomphrets, 87
potatoes, 32
sardines, 87
spinach, 510
sterile milk, 566
sucrose, effect of viscosity on sweetness, 129
sugar(s),
amino acid mixtures, 351
in beef and pork muscle, 300
changes in roasting of cocoa beans, 206
in fish muscle, 846
thermal degradation, 381, 561
sugar phosphates in fish muscle, 846
sulfite, effect on mushroom phenol oxidase, 807
sulfur components of pineapple, 721
surface activity of yolk, plasma and yolk fractions, 643
sweetness of sucrose, 129
sweet potato, precooked dehydrated flakes, 574

T

tangerine, alcohols in oil of, 167
taste, physiological basis of, 275
temperature,
post-mortem, 497, 504
pre-slaughter, 497, 504
tenderness,
of beef, 135, 450, 825
cold shortening, 450
of lamb, 262, 450
relation with shortening, 450
texture,
of apricots, 178
of freeze-dried chicken, 791
objective methods for, 1011
thiobarbituric-acid-reactive substances,
from autoxidized fatty esters and squalene, 552
in egg powder, 223
thiobarbituric acid, reactivity with lipid solvents, 386
tomato, greenhouse, 461
transeliminase, pectic acid, 838
turkey, myosin B fraction of, 680

U

ultracentrifugal analysis,
of cod protein extracts, 649
of myosin B fraction of turkey muscle, 680

V

vapor pressure of frozen bovine muscle, 196
vegetables,
Capsicum frutescens, 141
chlorophyll in, 210
egg plant, 317
fluoride content of, 941
frozen, 234, 328
green beans, 488
mixture for human feeding, 626
mushrooms, 807
navy beans, 781
potatoes, 32, 157
tomatoes, 461
vinegar, 172
viscoelastic materials, agricultural products as, 686
viscosity, effect on sweetness, 129
vitamins, 22, 510, 807
volatile components of,
Bartlett pear, 69
foods, 937
haddock, 389
Jamaica rum, 951
peach, 81
pineapple, 721
ripening pears, 558
sterile concentrated milk, 566
vinegar, 172

W

water,
effect on autocatalyzed oxidation of methyl linoleate, 878
effect on cobalt catalyzed oxidation of methyl linoleate, 885
wheat, varieties, 94
wheat flour, 94
protein, 38

Y

yeast,
in grape juice fermentation, 620
on irradiated crab meat, 424
yolk plasma, lipoprotein from, 812
yolk, surface activity of, 643

Z

zinc, autoxidation of oxymyoglobin, 468
